**NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM**

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name **Rogers Park Manor Bungalow Historic District**

other names/site number

2. Location

street & number **Roughly bounded by West Lunt Avenue (north),
North Western Avenue (east), both sides of West
Farwell Avenue (south) and North California Avenue (west)** Not for publication

city or town **Chicago** _____ vicinity
state **Illinois** code **IL** county **Cook** code **031** zip code _____

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register Criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- X** **A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- X** **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or a grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance (Enter categories from instructions)

**Community Planning and Development;
Architecture**

Period of Significance 1920-1929

Significant Dates 1920; 1922; 1925/1926; 1929

Rogers Park Manor Bungalow District
Chicago, Cook County, Illinois
Chicago Bungalows MPS

Narrative Description

Summary Description:

The Rogers Park Manor Bungalow District is located in the West Ridge Community Area on the north side of Chicago, approximately 9 miles from the city's commercial center. The district is bound on the east by North Western Avenue and on the west by North California Avenue, encompassing all of West Farwell Avenue, West Morse Avenue, and West Coyle Avenue, as well as the south sides of the 2400, 2500, 2600, and 2700 blocks of West Lunt Avenue. Brick bungalows form the bulk of the district, accounting for 247 of the 329 primary structures built within the period of significance. These bungalows are interspersed with multi-unit apartment buildings, antecedent frame and stucco bungalows, and examples of other types of single-family homes dating from the period of significance, 1920-1929. Rear contributing garages numbering 235 also survive from the period of significance. Built between 1920 and 1931 by dozens of different architects and builders, Rogers Park Manor encompasses a wide range of Chicago bungalow subtypes. The district reflects the coming of age of the Chicago bungalow, when local architects and builders began experimenting with form and stylistic detailing to create bungalows that were truly unique to Chicago. Chicago bungalow neighborhoods like Rogers Park Manor offered home buyers more than solid, well-made homes; they made good residential design accessible to middle-class families. Despite the number of participants and the variety of housing types, the growth and development of Rogers Park Manor maintained a uniform scale and a sense of cohesiveness through strictly maintained setbacks and the thoughtful arrangement of different building types. The one-and-one-half-story brick bungalows and their frame and stucco bungalow antecedents mix amicably with brick two- and three-flats and other modest brick homes with Tudor and Mediterranean Revival detailing. More substantial single family homes, mainly Tudor Revival and Mediterranean Revival, and large multi-unit apartment buildings occupy several of the more spacious corner lots, accenting but not interrupting the smaller scale housing on the district's interior lots.

Chicago, Cook County, Illinois
Chicago Bungalows MPS

Common features such as brick construction, grouped fenestration, and decorative brick and limestone detailing visually connect the Chicago bungalows to other building types in the neighborhood and add to the sense of cohesiveness in the district. Thirty-two buildings have been built since the period of significance in Rogers Park Manor; however, these structures are largely confined to the periphery of the district and do not detract from the core of Chicago bungalows and contemporary early 1900s residences. Only nineteen structures in the district have been altered to such an extent as to render them noncontributing structures. The majority of these alterations consist of large second story additions which obscure the bungalow's original one-and-one-half story design. Otherwise, the bungalows in the district retain their early twentieth century appearance, as outlined in the registration requirements of the Chicago Bungalow Multiple Property Listing.

Site and Setting:

The Rogers Park Manor bungalow district is situated in the Rogers Park neighborhood in Chicago, just north of West Pratt Avenue and west of North Western Avenue, two major commercial thoroughfares. The district consists of twenty-eight block faces, each containing between thirteen and sixteen individual lots. With the exception of the 2400 blocks along the district's eastern boundary, which are cut short to make room for commercial buildings facing east on North Western Avenue, and the south block faces of North Lunt Avenue, which contain many larger apartment buildings, the block faces are consistently divided into fifteen or sixteen lots. Although lot sizes in the district range from twenty-five feet wide to seventy feet wide, the average size of interior lots is approximately thirty to thirty-five feet wide and 124 feet deep. Corner lots and lots occupied by multi-unit dwellings are generally wider. Buildings face north and south along the four east-west streets which run through the district—West Lunt Avenue, West Coyle Avenue, West Morse Avenue and West Farwell Avenue. These streets are designated for one-way traffic and measure twenty-seven feet ten inches wide. The right-of-way on each block face includes street lawns fronting the street pavement, as well as sidewalks between the street lawns and the property lines of the individual building

Chicago, Cook County, Illinois
Chicago Bungalows MPS

lots. The street lawns measure approximately twelve feet in depth. The sidewalks are consistently six feet wide. With few exceptions, buildings are set back approximately thirteen-and-a-half feet from the street. Despite this strict adherence to a uniform setback, the bungalows in the district vary dramatically in both their size and the percentage of lot space they occupy. Building footprints for single family residences, two-flats and three-flats in Rogers Park Manor range from 520 to over 2500 square feet, and they can occupy as little as 10 percent or as much as 60 percent of their lots. The modest frame bungalow at 2414 West Coyle Avenue (built in 1923) measures nineteen feet wide and twenty-eight feet long and sits on a twenty-five-foot by 124 foot lot. With a building footprint of only 532 square feet, the bungalow occupies only about seventeen percent of the total lot space. In contrast, the brick bungalow at 2529 West Coyle has a building footprint of 2,072 feet—larger than most of the two-flats and three-flats in the district—and takes up nearly half of its thirty-five-foot by 124-foot lot.

Frame and brick garages measuring approximately twenty by thirty feet occupy the rear portion of most of the district's bungalow lots. Garages that serve interior lots generally face the alley, while those associated with corner bungalows tend to face the side street for easier access. The Rogers Park Manor bungalow district contains 235 garages that date from the period of significance, 1920 to 1929. For the most part, these garages are simple, utilitarian frame or brick structures. Some notable exceptions include the garages at 2449 and 2453 West Coyle, which feature face brick and clay tile roofs that match the bungalows they serve. These two garages are also unique in that they face the street rather than the alley; a common driveway between the two buildings provides access to these garages.

Materials and Stylistic Variation:

Very few bungalow neighborhoods in Chicago were conceived and constructed by a single developer working with a single architect. Most, like Rogers Park Manor, emerged over the span of a decade or more as the product of large and small scale developers, individual builders, and owners building homes for

National Park Service

NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET

Section 7 Page - 4 -

Rogers Park Manor Bungalow District
Chicago, Cook County, Illinois
Chicago Bungalows MPS

themselves. Some builders worked directly with local architects to create original designs, while other builders relied on pattern drawings or served as their own architects. The large number of participants involved in the building of Rogers Park Manor ensured a diversity of building types and styles. The district reflects a clear preference for bungalows, with frame, stucco, and brick bungalows representing over two thirds of the buildings in the area. However, other popular types of single family homes—mainly derived from the Tudor and Mediterranean Revival styles—are also represented in Rogers Park Manor. Like many other neighborhoods in the bungalow belt, Rogers Park Manor also includes some higher density residential structures concentrated mainly along West Lunt Avenue, facing Indian Boundary Park. These buildings, while not considered Chicago bungalows or antecedent forms of the Chicago bungalow, are contributing structures within the Rogers Park Manor bungalow district because they were constructed during the period of significance and contribute to the sense of a varied yet cohesive streetscape. Despite the variety of building types and styles, common materials like brick, limestone, and terra cotta, and common features such as grouped fenestration, decorative brick and limestone detailing, and art glass windows serve to visually connect these other building types to the Chicago bungalows in the neighborhood and add to the sense of cohesiveness in the district.

Brick is by far the most common building material used in Rogers Park Manor. Brick buildings occupying corner lots in the district have face brick on both street-facing elevations, while buildings on interior lots feature face brick only on their façades. Face brick in the district ranges in color from light grays, tans, and yellows to deep reds and browns. Although colorful face brick was used in many bungalow neighborhoods as an inexpensive way to differentiate between identical designs within a streetscape, builders in Rogers Park Manor used face brick more decoratively. The mottled green and red face brick used at 2501 West Morse compliments the bungalow's bright red tile roof, while more subtle yellows and tans on bungalows such as 2612 and 2614 West Coyle highlight architectural details like rounded art glass windows. Secondary materials include wooden elements used to construct the handful of frame and stucco bungalows

Chicago, Cook County, Illinois
Chicago Bungalows MPS

in the district, as well as the frame dormers, window frames, exterior doors, and rear porches (many of which have since been enclosed) for brick buildings, and limestone used for planter brackets, sills, copings, and decorative accents. A good number of buildings in the district, particularly late 1920s bungalows, Mediterranean style homes, and some apartment buildings, feature terra cotta tile roofs. Notable examples include developer Edward Zeches's impressive terra cotta home at 2557 West Farwell, a three-story brick and limestone apartment building at 2443-5 West Lunt, and the 1928 Chicago bungalow at 2522 West Coyle. A few bungalows, such as 2616 and 2525 West Farwell, have retained their original decorative concrete tile roofs. However, most of buildings in the district feature modern asphalt tile or asphalt sheet roofing over what was most likely original asbestos shingle roofing material.

The majority of the buildings in Rogers Park Manor date from 1923 to 1927. Early building in the area was confined to modest and simple frame, brick and stucco homes, such as the stucco bungalow at 2444 West Coyle, built in 1923. The first Chicago bungalow in Rogers Park Manor was built in 1922 at 2501 West Morse Avenue by contractor Andrew Nelson for his family, and its simple form set the precedent for the first wave of bungalow building in the district. Architects and builders in Rogers Park Manor built primarily simple brick bungalows with flat or slightly projecting front bays, groupings of standard double hung windows, recessed corner or side entrances, and minimal limestone detailing through 1924 and 1925. The bungalows at 2427 & 2429 West Coyle Avenue and 2441 West Morse Avenue are typical of this type of Chicago bungalow. In 1926, the form of the Chicago bungalows in Rogers Park Manor began changing quite dramatically, as the area became more popular with white-collar workers and professionals and housing prices rose. Bungalows constructed after 1925 in the district feature greatly enlarged, more rounded front bays with art glass windows and carved limestone details. Entrances are pushed back along the side of the house, and are much less a primary feature of the façade than in earlier bungalows in the district. Three good examples of this more elaborate later style of Chicago bungalow can be seen at 2543 West Morse Ave, 2529 West Morse, and 2630 West Morse Avenue—all designed by architect Benedict Bruns for various

developers in 1926, 1927, and 1928, respectively. There were obviously exceptions to the rule—incredibly innovative bungalow designs, like those by Gubbins and McDonald at 2524, 2530, 2534, 2538, 2540 and 2544 West Morse Avenue, appeared early in the district, and plainer bungalows continued to be built into the late 1920s. However, the overall character of the neighborhood was formed by these two distinctive bungalow building trends.

Statement of Significance

The Rogers Park Manor Bungalow Historic District meets the National Register Criteria outlined in the Chicago Bungalows Multiple Property Listing. With 329 properties, 247 of which are Chicago bungalows, developed between 1920 and 1929, the district meets National Register Criterion A for local significance by being associated with events that contributed to broad patterns of Chicago history—the promotion of single-family homeownership for city residents, countering the twentieth century trend toward increasing residential densities that characterized Chicago's contemporary apartments and tenements. For Criterion A the years of significance are 1920 to 1929, representing the first and last years of construction in the district.

Possessed of a high degree of original architectural and urban integrity, the district also meets National Register Criterion C for local significance by embodying the characteristics of a distinctive type, period, and method of residential construction—the bungalow. Chicago bungalow neighborhoods like Rogers Park Manor offered home buyers more than solid, well-made homes; they made good residential design accessible to middle-class families. Although the basic form of the Chicago bungalow was limited by the constrictions of local building codes and long, narrow urban lots, by its peak in the late 1920s the Chicago bungalow had become an important part of the architectural fabric of the city. Local bungalow architects Benedict J. Bruns, Ernest Braucher, Lyman Allison, and dozens of others experimented with form and stylistic detailing to create bungalows that were truly unique to Chicago. Nowhere is this trend more evident than in Rogers Park Manor, where the early form of the practical and efficient but understated bungalow quickly gave way to large and elaborate homes that challenged the accepted idea of the Chicago bungalow. Developer Edward Zeches and architect Benedict J. Bruns designed and built a large percentage of the homes in the Rogers Park Manor nomination area. Although not always paired together, Zeches and Bruns were the most influential forces in shaping the development of Rogers Park Manor, and the many

District

Rogers Park Manor Bungalow

Chicago, Cook County, Illinois
Chicago Bungalows MPS

other architects, developers and builders in district followed in their footsteps when they built bungalows in Rogers Park Manor. Despite the variety of participants, the Rogers Park Manor district exhibits a uniform scale and a sense of cohesiveness because of the predominance of one-and-one-half story brick bungalows.

The Rogers Park Manor Bungalow District maintained a strictly residential urban pattern that stood in sharp contrast to Chicago's nineteenth century communities, where residential and commercial and industrial activities overlapped in the built environment. Thus, Rogers Park Manor and other bungalow neighborhoods, with their distinct land-use patterns that anticipated Chicago's 1923 adoption of comprehensively zoned land uses and building restrictions, also represent a distinctive type as encompassed by National Register Criterion C. For Criterion C the years of significance are 1920 to 1929, indicating the dates of construction for the first and last bungalows in the district.

Historical Summary

The development of Rogers Park Manor in the 1910s and 1920s characterized the rise and enormous popularity of Chicago bungalow neighborhoods between 1907 and 1930. Between 1900 and 1930, Chicago's population doubled as 1.5 million additional residents settled into the city. During this same period the number of owner-occupied housing units in Chicago rose from 86,435 in 1900 to 261,750 in 1930. The tens of thousands of one-and-one-half story brick bungalows built in the city's outlying neighborhoods between 1910 and 1930 stood at the forefront of this expansion of single-family homeownership. Built together, many times in entire blocks, the unprecedented form of Chicago bungalows created an entirely novel form of Chicago urbanism. While facilitating the American dream of homeownership for many Chicago residents, neighborhoods like Rogers Park Manor created a harmonious and aesthetically cohesive residential landscape out of the truck farms and vast prairie that had surrounded the city.

The area of West Rogers Park, or West Ridge, was inhabited first by Potawatomi Indians in the 17th century, followed by German and Luxembourger farmers who settled the area during the 1830s and 1840s.¹ West Ridge was incorporated as a village in 1890 and was annexed to Chicago in 1893, but annexation alone did not bring immediate growth. Although the areas east of West Ridge flourished thanks to early rail connections to Chicago (both the Chicago & Northwestern Railway and the Chicago, Milwaukee and St. Paul Railroad had been serving the lakeside village of Rogers Park, just east of West Ridge since the 1860s), the lack of adequate transportation lines hampered growth in West Ridge. Much of the West Ridge community remained predominately rural well into the early 1900s, consisting of farms, greenhouses and open prairie. The population remained under 500 until after 1900; residents farmed the land and relied on Rogers Park or Evanston for occasional goods and services.²

Inroads into the area began slowly, with only moderate success. In 1899, Western Avenue was extended northward to connect the West Ridge area to the rest of Chicago, creating the first direct link between the small community and the city. Western Avenue became the longest street in Chicago, surpassing Halsted. The development of brickyards along the North Branch of the Chicago River, a direct result of the copious amounts of clay made available by the construction of the North Shore Channel of the Sanitary District of Chicago in 1909, brought German and Scandinavian laborers to the western part of West Ridge. However, interest in wide-scale residential real estate development to fill the open land between the brickyards and emerging commercial corridor along Western Avenue would not begin in earnest until after World War I, when the population boom created a scramble for new housing in previously undeveloped parts of the city.³

Anticipating that development would eventually come to West Ridge, landowner Adolphus S. Coyle formed the real estate company National City Realty with partner Albert D. Birdsall. Together, they subdivided Coyle's landholdings just west of North Western Avenue and north of West Pratt Avenue in 1911

Chicago Bungalows MPS

and 1912. The subdivision was christened Rogers Park Manor, drawing on the familiarity and positive associations of the flourishing Rogers Park community. However, the area was still too isolated to attract residential development. In 1915, the closest streetcar line ran along Clark Street, almost one mile east of Rogers Park Manor. Not until the late 1910s, when the Western Avenue streetcar was finally extended north from Lawrence Avenue to Howard Street, did interest in the residential possibilities of West Ridge take hold. Ads for streetcar lines advertised trolley tours through the newest annexed neighborhoods, including West Ridge. National City Realty sold the first parcels of land in Rogers Park Manor around 1918; sales in this and other subdivisions in the area were brisk enough by the early 1920s to allow the company to establish an office in the Republic Building at 209 South State Street.⁴

Coyle and Birdsall gave little thought to the overall design of Rogers Park Manor outside of the elements that would maximize its profit-making potential. The lots were sold over a 15-year period between 1915 and 1930 to willing developers and builders who, in combination with various architects and contractors, built homes in the subdivision one at a time or in small groups of no more than five. This pattern of development gave Rogers Park Manor a sense of diversity in its housing stock that more rigidly planned bungalow neighborhoods like Schorch's Irving Park Gardens lacked. Early building in the area was confined to modest and simple frame, brick and stucco single family homes. Unlike Rogers Park, which had evolved into a dense conglomeration of multi-unit apartment buildings served by high capacity rail systems, Rogers Park Manor, constrained by the limitations of its single streetcar line, emerged as a single family residential community. This pattern was set in many communities along the bungalow belt, where relatively low capacity streetcar lines encouraged lower density development than commuter rails.

The first home constructed in what would become Rogers Park Manor was a one story frame cottage at 2626 West Morse Avenue, completed in early 1920. Frame and stucco cottages like those at 2415 West Morse, 2418 West Farwell, 2447 West Lunt, and 2611 West Coyle, all of which were completed in 1921 and

Chicago Bungalows MPS

1922, quickly followed. By late 1922, the Chicago bungalow had made its first appearance in Rogers Park Manor. Constructed by Andrew Nelson and designed by architect C. Nicholson in the fall of 1922, 2501 West Morse Avenue was the first Chicago bungalow built in the district.⁵ Colorful mottled red and green brick, a graceful arched entryway, broad overhanging eaves and a painted cement tile roof help this bungalow to stand out despite its simple flat front and rectangular shape.

Bungalow building began in earnest in Rogers Park Manor in 1923, as work started on several brick bungalows on Farwell and Morse Avenues. 2432 West Farwell, a standard square-front Chicago bungalow with recessed corner entrance, was built by developer Arvid Nelson, and stood in marked contrast to its neighbor, 2434 West Farwell, which was going up at the same time. 2434 West Farwell, a wide Arts and Crafts style bungalow with gently curving eaves and a corner porch supported by a massive battered stone post, was designed by bungalow architect Lyman J. Allison for owner C. Kreiter. In June of 1923, developer George Siegrew began construction on a group of five homes on the 2400 block of Farwell. Siegrew and Swedish architect William C. Presto used different rooflines, brick color, and entry locations to create subtle variety within this grouping of bungalows, all of which feature large square front bays with banks of Prairie-style windows and decoratively scrolled rafter tails under protruding eaves. By the end of 1923, several small clusters of bungalows had been completed, all with simple shapes and modest architectural details. 2514 West Morse, a gambrel roof building with a bungalow-style polygonal bay and Tudor revival style gabled entrance, proved to be the most elaborate, if not the most cohesive, house completed in Rogers Park Manor that year.

Architects and developers followed this simplified, economical formula for the bungalows in Rogers Park Manor until the later 1920s. With few exceptions, the bungalows built between 1924 and 1925 in the district exhibit the same features—flat or slightly projecting three-sided front bays, multiple groupings of double hung windows with vertical muntins, recessed corner or flush side entrances, and geometric

Chicago Bungalows MPS

limestone detailing—as their predecessors. The average cost of construction for these bungalows was \$5000 to \$6500.⁶ Builders also applied this bungalow template to the brick two- and three-flat apartment buildings constructed in Rogers Park Manor, which often resembled two or three bungalows stacked on top of one another. These apartments began appearing in late 1924, and because of their similarity to the bungalows around them, they complemented the emerging character of the neighborhood. With the exception of West Lunt Avenue facing Indian Boundary Park and a portion of the south side of the 2500 block of West Coyle Avenue, these apartment buildings were constructed singly and tucked discreetly into the blocks. Developer Edward Zeches' group of four two-story brick apartment buildings at 2541, 2545, 2547 and 2551 West Coyle, designed by architect A. F. Feschel and constructed in 1925, are typical examples of the smaller apartment buildings in the district. Bands of four double hung windows stretch across a square front bay; a recessed entry bay houses an interior stair that provides access to the different units. Decoration is limited to limestone medallions and stringcourses that accent the window openings.

Despite their restrained style, the early bungalows in Rogers Park were well built and, for the most part, well designed homes. Architects like Benedict Bruns, Lyman Allison and Ernest Braucher were already familiar names within the emerging bungalow belt by the time Rogers Park Manor began to develop, and their early bungalows, though simple, reflect their understanding of the form. Bruns designed forty-seven homes in the Rogers Park Manor district; Allison was responsible for twenty-six. Bruns was the most prolific architectural contributor to the bungalow development in the Rogers Park Manor neighborhood. He started very early in the neighborhood, in 1923, with six frame bungalows mostly on the east side of the neighborhood. In 1924, he designed ten brick flat front bungalows and two two-flats. They were also relatively modest in ornament. His next sixteen bungalows completed in 1925 featured mostly polygonal bays (among the earliest in the district), with the exception of three flat front bays. Bruns was also among

the first to begin to develop more ornamentation in his bungalows with various brick patterns, limestone detailing, and the incorporation of leaded art glass windows.⁷

Bruns and Allison, like most bungalow architects in Chicago, relied on horizontal emphasis through low-lying rooflines, expansive eaves, grouped windows, and decorative brick and limestone detailing to connect their bungalows to the surrounding landscape, and both architects seems to have been influenced by each other's designs in Rogers Park Manor. Bruns was particularly fond of using wing-like projecting eaves to make his bungalows appear more horizontal than they really were; this effect is most striking at 2517 West Farwell, where the eaves extend approximately five feet on each side of the building (broad enough to serve as the covering for the recessed corner entry), and 2539 West Morse, where the polygonal bay is set under squared eaves, resulting in very broad triangular overhangs at the corners of the bay. Allison designed similar bungalows at 2439, 2443, 2641 West Farwell, but he initially preferred a more direct interpretation of bringing the outside in, as seen in the covered porches on his 1923 bungalows at 2617 West Coyle, 2434 West Farwell, 2436 West Farwell, and 2609 West Farwell. One year later, Bruns appropriated this feature for several bungalows on Farwell and Coyle.

Early exceptions to the standard bungalow form hinted at the changes that would take place in the late 1920s, particularly on corner lots, which were typically larger and provided more space for architectural expression. Built by E. L. Jensen in the summer of 1925, 2600 West Farwell Avenue, is a side entrance bungalow with an unusually broad façade and features a graceful curved window bay holding four double hung windows with rounded transoms connected by a common limestone sill. Battered corner piers and a low-lying terra cotta tile roof with broad, overhanging eaves contribute to the bungalow's horizontality. Owner architect Fred Winter eschewed traditional limestone for concrete in his 1925 bungalow at 2500 West Farwell Avenue. Winter constructed the home with an unusually high raised basement, set off by five-foot-high knee walls of smooth, poured concrete. This modern looking base supports a traditional Chicago

bungalow form with an offset curved window bay and simple side entrance. Architect Ernest Braucher designed an unusual center-entrance bungalow for J. West Adams at 2632 West Morse in 1925, and Swedish contractor Carl Mantzer's home at 2525 West Farwell features another unusual entrance that is flush with the façade and allows for entry at the ground level.

Some developers in the district were also looking for designs that would distinguish their work from other builders in the district. The neighborhood development team of John J. Gubbins and Allan McDonald, whose offices were a stone's throw away on the corner of Lunt and Western Avenues, made a more radical departure from the standard bungalow form with their contributions to the district.⁸ In 1925, Gubbins and McDonald commissioned architect W. C. Wright to design two brick houses at 2449 and 2453 West Coyle Avenue. The houses, mirror images of the same design, each feature a square, flat-roofed projecting center bay flanked by simple raised porches and punctuated by casement doors crowned with decorative rounded panels. Wrought iron balconettes set off these casement doors and wrought iron railings enclose both porches. Concrete tile roofing painted in green and red complete the Mediterranean look. Wright designed a similar group of six Mediterranean and Spanish Revival style bungalows for Gubbins and McDonald on the 2500 block of West Morse Avenue. The bungalow at 2540 West Morse Avenue, with its recessed second floor sleeping porch and deeply recessed tunnel-like entryway, show Wright's willingness to experiment with the basic form of the Chicago bungalow. More importantly, Gubbins and McDonald's Mediterranean bungalows are modest examples of an architectural style that was extremely popular among builders of much larger homes in the district.

By 1926, the form of the Chicago bungalows in Rogers Park was changing dramatically, particularly as more white-collar households took an interest in the area and housing prices rose.⁹ In addition to a general increase in size, the most common alterations to the traditional Chicago bungalow were the enlargement of front rooms, the rounding of front bays, changes in the location and prominence of the main entrance, and

the addition of more costly details such as art glass windows. Front bays expanded forward and became more rounded, while front entrances receded. Early projecting bays like those at 2525 and 2539 West Farwell and 2428 and 2433 West Morse Avenue were contained under the main roofline of the house or projected only slightly beyond the home's primary rectangular massing. In contrast, the Chicago bungalows built after 1926 feature front bays that appear more as extensions rather than an integral part of the house itself. These large front bays often showcased locally designed and manufactured art glass, decorative brickwork, and carved limestone details. German contractor Edward Zeches, who developed sixteen houses in the district, was responsible for many of the most elaborate later bungalows. Zeches began working with architect Benedict Bruns in late 1925 on several bungalows on the 2500 block of West Morse. Bruns designed a large five-sided front bay with banks of art glass windows along each plane for the bungalows at 2543 and 2549 West Morse. Unadorned battered piers soften the edges of the bay; this element is repeated at the recessed corner entry, and serves to tie the two masses together. These two identical bungalows are separated by a more elaborate design, featuring a prominent curved bay with art glass windows separated by flared brick piers. The street facing entrance is set far back along the side of the house to accommodate what would become Zeches' signature curved bay. At 2657 West Farwell Avenue, which Zeches completed in January of 1927, the entire front of the house is given over to this type of curved bay. The main entrance is situated inconspicuously on the western elevation, beyond which a second shallow curved bay delineates the bungalow's dining room. Corner entrance versions of this bungalow, designed by the architecture firm Dewey and Pavlovich, appeared at 2531 West Coyle and 2554 West Morse.

Dewey and Pavlovich worked with other developers in Rogers Park Manor on bungalows very similar to those they were designing for Zeches. The architects teamed up with developer Joe Marschner in 1926 to build three impressive bungalows on the 2600 block of West Farwell. The most elaborate of the three, 2601 West Farwell features a five-sided bay with a large central band of art glass casement windows, a

Chicago, Cook County, Illinois
Chicago Bungalows MPS

prominent side entrance with a period metal awning, and a terra-cotta tile roof. Marschner also worked with Lyman Allison to build bungalows in Rogers Park Manor. While the majority of Allison's work in the district was confined to more basic early 1920s bungalows, he did complete several more elaborate bungalows in 1927 and 1928, including the one he designed for Marschner at 2652 West Farwell Avenue. Developers Arvid Nelson and J. A. Carrigan worked primarily with architect Benedict Bruns for their late 1920s bungalows. Bruns designed the bungalows at 2416, 2418, and 2422 West Morse for Nelson in 1928, and his work here adhered very closely to the new bungalow form that he had worked with Zeches to create in late 1926. Although the late 1920s bungalow differed radically from their more modest predecessors, they did not differ much from each other. In that sense, bungalow architects in Rogers Park had broken one mold but then quickly fashioned another, albeit more elaborate one, to replace it.

The last Chicago bungalow built in the Roger Park Manor district was completed on September 24, 1929, mere weeks before the stock market crash that would bring an end to the 1920s building boom that had nurtured the evolution of the Chicago bungalow. The bungalow at 2620 West Coyle, built by a man named Edward Reynolds for his own residence and designed by architect George Pearson, represents the peak of bungalow building in Rogers Park Manor, the completion of the trend from rectangular and one-dimensional to rounded and multi-dimensional.¹⁰ The large front bay is a true rounded bay (the only one in the district), uninterrupted by corners or piers. Generous art glass casement windows with arched transoms sit on a continuous limestone sill. Panels of decorative brickwork occupy the lower half of the bay, and overhanging eaves follow the entire perimeter of the house. The recessed covered entryway mimics the arched door and windows.

In the midst of the bungalow boom, there was a secondary building trend that guided the construction larger single family homes in Rogers Park Manor. Romantic revival styles, primarily Tudor Revival and Mediterranean Revival, were built throughout the 1920s in Rogers Park Manor by many of the same

CONTINUATION SHEET

Section 8 Page - 17 -
District

Rogers Park Manor Bungalow

Chicago, Cook County, Illinois
Chicago Bungalows MPS

developers and architects who were building the district's Chicago bungalows. Some of the most impressive examples include the Mediterranean Revival homes at 2454 West Morse and 2458 West Morse, both built by T. D. Randall and designed by architect Charles H. Markel between 1925 and 1926, and Edward Zeches' own home at 2557 West Farwell. This terra cotta clad interpretation of a Mediterranean villa, designed by Dewey and Pavlovich in 1928 and completed at a cost of \$22,000, was the most imposing and most expensive home in Rogers Park Manor.

Tudor Revival eclipsed Mediterranean Revival in Rogers Park Manor during the late 1920s, and became particularly popular on Morse Avenue. Swedish contractor Carl G. Lantz hired architect W. C. Wright to design his family's Tudor Revival style residence at 2555 West Morse in 1926, one of the earliest Tudor's on the street. A rusticated stone chimney and steeply gabled entrance bay dominate the façade; rusticated stone around the door and over the windows completes the effect. Zeches, Dewey and Pavlovich collaborated on an impressive example at 2442 West Morse in 1928, which features a large central chimney, steep gables with half-timbering, and rusticated stone accents. Walter Haring constructed a Tudor Revival style home for his family at 2553 West Morse in 1928, and similar homes were completed by developer A.K. Spander and architect Edward Benson at 2716 and 1718 West Morse in 1929.¹¹

Like most bungalow districts in Chicago, Rogers Park Manor drew families from a diverse array of ethnic and economic backgrounds together under the common goal of homeownership. Over one-third of the homes in Rogers Park Manor were owned by immigrant families, with another one-third owned by children of immigrants. German and Swedish families predominated in the district, but over 22 nationalities, including English, Canadian, Irish, Norwegian, Dutch, Greek, Italian, Russian, and Bohemian were also represented on the blocks. Residences in Rogers Park Manor housed lawyers and truck drivers, doctors and carpenters, musicians and small business owners. Many of the men who built Rogers Park Manor also settled in the community. Developer John Carrigan moved with his family into the bungalow at 2427 West Morse in

1926. Three of Carrigan's seven children were born in the house. Developers John Gubbins and Allan McDonald lived across the street from each other, in Mediterranean inspired bungalows on West Coyle Avenue they built in 1925. Swedish contractor Carl Mantzer built his home at 2525 West Farwell and several other bungalows in the district. Even Edward Zeches chose to settle in Rogers Park Manor, although he did forgo bungalow living for a more elaborate Mediterranean Revival home clad entirely in terra cotta. Arvid and Axel Nelson, Swedish born brothers who often worked together, both lived in the neighborhood—Axel in a two-flat on Lunt, and Arvid in the first brick bungalow built on Morse Avenue. Not surprisingly, given the amount of construction going on, a slew of men in the building trades also settled in Rogers Park Manor—painters and stone masons, brick layers, lathers and plasters, plumbers, electricians, heating specialists, excavators, and carpenters.¹²

Among the more colorful of the neighborhoods residents were known gangsters Timothy ("Big Tim") Murphy, who was shot and killed in front of his bungalow at 2525 West Morse in 1928, and Joseph Aiello, who lived with his extended family in the two story home at 2553 West Lunt Avenue until his murder in 1930.¹³ Murphy's death may have made Rogers Park Manor front page news, but no doubt residents preferred the less volatile professions of other famous faces in the community, including xylophonist Lou Chiha ("Signor Friscoe"), who recorded twelve records for Edison and was well-known among the vaudeville circuit, and artist George B. Petty. Petty, famous for his female pin-up drawings known as "Petty Girls" which helped launch *Esquire* magazine in 1933 and were distributed in magazines and calendars across the nation, worked from a studio in the basement of his bungalow at 2609 West Coyle. It was here that he designed his most celebrated work, the poster for the 1933 Chicago World's Fair.¹⁴

Homeowners in Rogers Park Manor took great pride in and felt a great responsibility for not only their own homes but the community as a whole. In the early years of its existence, Indian Boundary Park was collectively funded by the people of Rogers Park Manor as part of the Ridge Avenue Park District. Not until

the mid 1920s was the park taken over by the city, which built a large Tudor Revival field house on the property in 1929.¹⁵ That same year, Boone Elementary School was completed nearby at 6710 South Washtenaw. The bungalows that emerged in Rogers Park Manor between 1920 and 1929 allowed working and middle-class, blue- and white-collar families to also share in the American dream of homeownership. For these families, the bungalow provided a thoughtfully designed, solidly built, and thoroughly modern home that was adaptable enough to satisfy the needs and wants of homeowners ranging from the average wage earner to the successful professional. Architects and builders who constructed the bungalows in Rogers Park Manor met the considerable challenge of providing a housing type that appealed to a broad spectrum of homeowners. The variety of bungalows in Roger Park Manor, interspersed with other compatible styles of housing and held within a cohesive frame of uniform setbacks and regularly sized lots, allowed an economically, ethnically, and culturally diverse group of people to assimilate into a uniform American residential fabric.

¹Grossman, James R., Keating, Ann Durkin, and Reiff, Janice L. *The Encyclopedia of Chicago* (Chicago: The University of Chicago Press, 2004), 872-3. The boundary line of the 1816 Indian cession divides the nomination area of Rogers Park Manor in half, lending its legacy to the name for Indian Boundary Park, which forms the northern boundary of Rogers Park Manor.

⁷ Bruns had a thriving architectural business in Chicago. At one time, he employed as many as 5 draftsmen. His offices were located at 1548 W Belmont and later at 3959 Lincoln Avenue on the 5th floor. He was architect for many large developments in the city and suburbs and he was the architect for at least 47 homes in the Rogers Park Manor nomination area. In 1928, Benedict was awarded a 200 home project for Calumet City where there would be 25 different styles of bungalows to avoid the "pea-in-a-pod" appearance. He also designed 231 residences in Villa Park with 50 different designs, mostly of English or Spanish inspiration. Information from private papers of Benedict J. Bruns, loaned by family members.

Geographical Data

Boundary Description

The Rogers Park Manor Bungalow District is located in Section 36, Township 41 North, Range 13 East, UTM Grid Zone 16, Chicago, Cook County, Illinois, bound roughly by North Western Avenue on the east, North California Avenue on the west, the alley between West Farwell Avenue and West Pratt Avenue on the south, and West Lunt Avenue on the north. Beginning at 2711 West Lunt proceed east to the alley behind North Western Avenue, turn 90 degrees and head south to the alley south of West Farwell Avenue, turn 90 degrees and head west to 2743 Farwell, past 2743 turn 90 degrees and head north across Farwell Avenue and turn 90 degrees to the west to just past 2744 Farwell, turn 90 degrees and head north to the alley behind 2744 Farwell turn 90 degrees to the east and proceed to 2736 Morse turn 90 degrees and head north across Morse turn 90 degrees and head west to 2746 Morse, past 2746 turn 90 degrees and head north to Coyle Avenue at Coyle jog in one lot to 2747 West Coyle turn 90 degrees and head north to the alley at the alley turn 90 degrees and head east to the rear lot line of 2711 West Lunt turn 90 degrees and head north to the point of beginning.

Boundary Justification

The boundaries of the district encompass nearly sixteen residential blocks of primarily Chicago bungalows developed between 1920 and 1929, which form a cohesive and relatively uniform landscape consistent with other Chicago bungalow districts. The district is bound on the east by the alley just west of North Western Avenue, behind the commercial blocks facing east on that street. The western boundary is more irregular, following the point on each block where pre-depression development stopped. North Lunt Avenue forms the northern boundary, facing Indian Boundary Park, and the alley between West Farwell and West Pratt marks the district's southern boundary. Relatively few significant alterations to the bungalows detract from their original expressions. The character of the neighborhood is further preserved by the continued use of its bungalows exclusively as private residences. The architectural continuity of this neighborhood does not extend in any direction beyond the district's boundaries. While a residential character persists directly west of the boundaries, the consistency of form present in the district is interrupted by the presence of large numbers of housing types constructed outside the period of significance, which accounts for the district's irregular western boundary. Commercial buildings line North Western Avenue, a heavily traveled two-way, four-lane street, marking a clear shift in neighborhood character east of the district. While bungalows proliferate south of the district, they are separated from Rogers Park Manor by West Pratt Avenue, a main thoroughfare.

Springfield, IL 62702

Re: Chicago nominations to the National Register of Historic Places for
• **the Building at 2044 - 2048 W. Farwell Ave.; and**
• **the Rogers Park Manor Bungalow Historic District**

Dear Ms. ^{Tracey}Sculle:

This is in response to your letters of June 10, 2005, to the Commission on Chicago Landmarks asking for the Commission's comments on the nominations of the properties referenced above to the National Register of Historic Places. As a Certified Local Government (CLG), the City of Chicago is given the opportunity to comment on local nominations to the National Register prior to being considered by the Illinois Historic Sites Advisory Council.

At its regular meeting of August 4, 2005, the Commission voted unanimously to support the National Register listings for both nominations. The Commission's resolution is attached.

Please contact Terry Tatum of my staff at 312-744-9147 if you have any questions.

Sincerely,

Brian Goeken
Deputy Commissioner
Landmarks Division

Joseph Beason, 2044-48 West Farwell Condominium Association

Resolution
by the
Commission on Chicago Landmarks
on the
Nominations to the National Register of Historic Places
for the

Building at 2044 - 2048 W. Farwell Ave.

And the

Rogers Park Manor Bungalow Historic District

August 4, 2005

The Commission on Chicago Landmarks finds that:

- the Building at 2044-2048 W. Farwell Ave. is unusual in the context of the far North Side of Chicago in its use of the Spanish Baroque Revival style. It possesses local significance and is eligible under Criterion C for listing on the National Register of Historic Places; and
- the Rogers Park Manor Bungalow Historic District is a fine and consistent collection of Chicago bungalows and related buildings built predominantly in the 1920s. It is being nominated under the Multiple Property Documentation form for “Chicago Bungalows.” It possesses local significance and meets Criterion A for community planning and development and Criterion C for architecture.

Now, therefore, be it resolved by the Commission on Chicago Landmarks that it hereby supports the listing of both nominations to the National Register of Historic Places.

TO: Mayor Richard M. Daley, City of Chicago
Brian Goeken, Landmarks Division, Department of Planning and
Development

FROM: Tracey A. Sculle, Survey and National Register Coordinator *TAS*

DATE: June 10, 2005

SUBJECT: Preliminary Opinion on the Rogers Park Manor Bungalow Historic District

The Rogers Park Manor Bungalow Historic District is a distinct area of Chicago bungalows, Revival style houses and 2-flats in the West Ridge Community Area of north Chicago. The district is bounded by West Lunt Avenue on the north, North Western Avenue on the east, West Farwell Avenue on the south and North California on the west. The contributing buildings in the district were built between 1920 and 1929. The majority of the residences in the district are clearly Chicago bungalows in form and design. A number of Revival style house, 2-flats and secondary garage buildings are also included within the district. The houses were built by a number of different contractors and architects. The district meets Criterion A for community planning and development and Criterion C for architecture and represents a very consistent and unified area of Chicago bungalows within this area of the city. The period of significance for the district is from 1920, when the first houses were built to 1929, the year to last houses were built. The district retains sufficient integrity to convey both its historic and architectural merit.
